Mon, 05 Nov 2018 05:04:00 GMT AP LAB 5c: REDOX Titration Simulations - The titration in this lab took place between the strong acid HCl and the strong base, NaOH. In strong acid/strong base titrations, the equivalence point is found at a pH of 7.00. In titrations with a weak base and a strong acid, the pH will always be less than 7 at

the equivalence point because the conjugate acid of the weak base lowers the pH.
